SAYS	THINKS	DOES	FEELS
"I have a story idea." "I want to see it as a comic." "I need it quickly."	Can AI handle the story structure? Will characters remain coherent? Can I export the result?	Writes a prompt Tries AI tools Reviews and refines output Shares the result	Curious Creative Sometimes uncertain about technical complexity

Design implication: keep the input flow simple, automate outline/story/image generation, and present the result as recognizable comic panels.
