

Project Executable Files

Date: 30 September 2026
Team ID: SWTID-2026-4040
Project Name: ComicCraft — AI Comic Story Creator Using Gemini Models
Team Leader: Bala Esakki R
Team Members: Sandhiya D, Rithikaa B, Anitha R, Anbuselvi
Team Size: 5
Maximum Marks: 5

Source Package Included

The final ZIP includes the original uploaded ComicCraft source under “ComicCraft Source”. The principal executable/application files are listed below.

File	Role
03_main.py	FastAPI application entry point.
04_routes.py	HTTP routes and generation orchestration.
05_gemini_flash.py	Gemini Flash outline generation.
06_gemini_pro.py	Gemini Pro story generation.
07_image_generator.py	Stable Diffusion image generation.
08_layout_builder.py	Comic layout assembly.
09_requirements.txt	Python dependencies.
10_index.html	User input form.
11_comic_preview.html	Generated comic preview.
12_export_success.html	Export-success page.

Run/Packaging Note

Before execution, align the package imports (the source currently imports modules from an app package) and add/repair the referenced exporters.py implementation. Configure GEMINI_API_KEY securely. Stable Diffusion also requires a compatible runtime and model-download access.
