

Data Flow Diagram

Date: 30 September 2026

Team ID: SWTID-2026-4040

Project Name: ComicCraft — AI Comic Story Creator Using Gemini Models

Team Leader: Bala Esakki R

Team Members: Sandhiya D, Rithikaa B, Anitha R, Anbuselvi

Team Size: 5

Maximum Marks: 2

Level-0 Data Flow

[User] → [FastAPI /generate] → [Gemini Flash: Outline] → [Gemini Pro: Story] → [Stable Diffusion: Images] → [Layout Builder] → [Comic Preview / PDF Export]

Supporting flow: GEMINI_API_KEY is read from the environment and used by the Gemini integration modules. Generated panel image paths and layout data are passed to the preview/export stages.

Processes

Process	Input	Output
1. Receive comic request	Story prompt, character, setting, tone, art style	Validated request
2. Generate outline	Story prompt	Panel outline + image prompts
3. Generate story	Panel outline	Narration/dialogue text
4. Generate images	Panel image prompts	Panel image files
5. Build layout	Outline + story + images	Comic layout
6. Present/export	Comic layout	Preview and export flow

No persistent application database is present in the uploaded source. The current flow is request-oriented and relies on runtime files and external AI model calls.
