

Performance Testing

Date: 30 September 2026

Team ID: SWTID-2026-4040

Project Name: ComicCraft — AI Comic Story Creator Using Gemini Models

Team Leader: Bala Esakki R

Team Members: Sandhiya D, Rithikaa B, Anitha R, Anbuselvi

Team Size: 5

Maximum Marks: 5

Step 1: Testing Overview

Field	Details
Testing Tool Used	No load-testing tool/evidence supplied in the uploaded ZIP.
Type of Testing	Performance testing is documented as a plan; actual benchmark results were not supplied.
Target Module / API	POST /generate and the Gemini/image-generation pipeline.
Test Environment	Not specified in supplied evidence.
Test Date	Not supplied.

Step 2: Test Scenarios

S.No	Scenario	Virtual Users	Duration	Expected Outcome
1	Single comic generation	1	To be measured	Successful generation within acceptable interactive time.
2	Repeated sequential generation	1	To be measured	No memory/resource leak and successful independent requests.
3	Concurrent generation	5	To be measured	Service remains responsive or fails gracefully.
4	Image-generation stress	5	To be measured	GPU/CPU/memory remain within deployment limits.

Step 3: Results

Metric	Target	Actual	Status	Remarks
Average response time	< 2 sec target from template	Not measured	Pending	AI/image generation likely makes this target deployment-dependent.
Maximum response time	< 5 sec target from template	Not measured	Pending	Requires controlled benchmark.
Throughput	Define per deployment	Not measured	Pending	Depends on Gemini API and image-generation hardware.
Error rate	< 1% target	Not measured	Pending	Requires load test.
CPU utilization	< 80%	Not measured	Pending	Measure during generation.
Memory utilization	< 80%	Not measured	Pending	Measure during Stable Diffusion load.

No performance numbers have been invented. The supplied project evidence supports functional testing documentation, but not a reproducible load/performance benchmark.
