

Communication

Date: 30 September 2026

Team ID: SWTID-2026-4040

Project Name: ComicCraft — AI Comic Story Creator Using Gemini Models

Team Leader: Bala Esakki R

Team Members: Sandhiya D, Rithikaa B, Anitha R, Anbuselvi

Team Size: 5

Maximum Marks: 5

Section	What to Communicate
Problem	Comic creation requires writing, sequencing and visual skills; users need a simpler workflow.
Solution	ComicCraft coordinates Gemini Flash, Gemini Pro and Stable Diffusion through FastAPI.
Workflow	Input → outline → story → images → layout → preview/export.
Innovation	Combines structured story generation and image generation into a single comic-oriented flow.
Evidence	Show the input form, generated outline/story, generated panel images and preview.
Limitation	Explain that API availability, GPU requirements and the exporter/import alignment affect deployment.

Suggested speaking order: Bala Esakki R opens with the problem and architecture; the team members demonstrate AI generation, image generation, UI/preview, testing and future enhancements.
