

Brainstorming & Idea Prioritization

Date: 30 September 2026 | Team ID: Not provided | Team Size: 5

Project Name: ComicCraft – AI Comic Story Creator Using Gemini Models
Team Leader: Bala Esakki R
Team Members: Sandhiya, Anitha, Anbuselvi, Rithikaa

The project was ideated around the gap between having a creative story idea and being able to structure it into a usable comic script. The team considered several AI-assisted creative applications before focusing on comic-story generation.

Idea	Problem Addressed	AI Opportunity	Priority
AI Comic Story Creator	Difficulty structuring stories into comic panels	Generate panel-by-panel narrative with Gemini	Selected
AI Caption Generator	Difficulty writing social captions	LLM text generation	Alternative
AI Story Summarizer	Long content is difficult to condense	LLM summarization	Alternative
AI Character Generator	Character design is time-consuming	Text/image generation	Future extension

Selected idea: ComicCraft — an accessible Generative AI tool that converts a short user idea into a structured five-panel comic story.

Selection rationale: The idea combines creative writing, structured output, prompt engineering and a clear user-facing workflow while remaining lightweight enough for a student project.
