Project Name: ComicCraft – AI Comic Story Creator Using Gemini Models

Team Leader: Bala Esakki R

Team Members: Sandhiya, Anitha, Anbuselvi, Rithikaa

Primary problem statement

Aspiring storytellers, students and content creators may have a story idea but lack the time, writing experience or comic-planning skills required to convert it into a coherent panel-by-panel comic narrative.

Root causes

- Comic planning requires scene sequencing, character actions and dialogue decisions.
- General-purpose AI writing often returns continuous prose instead of a comic-ready panel structure.
- Maintaining character identity across multiple generated scenes can be difficult.
- Creating visual prompts separately adds additional effort.

Opportunity statement

Create a simple AI-assisted workflow that accepts one story idea and returns a structured five-panel comic story with scenes, actions, dialogue and image prompts.
