Project Name: ComicCraft – AI Comic Story Creator Using Gemini Models

Team Leader: Bala Esakki R

Team Members: Sandhiya, Anitha, Anbuselvi, Rithikaa

S.No	Architecture Component	Technology Chosen	Purpose / Justification
1	Frontend / Client	Streamlit	Simple Python-based interactive UI suitable for a lightweight AI application.
2	Backend / Application	Python	Handles input, prompt construction, Gemini calls, parsing and output rendering.
3	AI / LLM	Google Gemini + Google GenAI SDK	Generates structured comic content from the user's story idea.
4	Configuration	python-dotenv + environment variable	Keeps GEMINI_API_KEY outside source code.
5	Output	Text download / session output	Allows users to save generated stories without a database.
6	Version Control	Git / GitHub	Source-code collaboration and version management.
7	Development	Visual Studio Code	Documented development environment.

Important implementation note: the supplied ZIP also contains FastAPI/Diffusers prototype files that do not match the Streamlit implementation described by the supplied project report. The final source should be reconciled with the report before external evaluation.
