Project Name: ComicCraft – AI Comic Story Creator Using Gemini Models
Team Leader: Bala Esakki R
Team Members: Sandhiya, Anitha, Anbuselvi, Rithikaa

Project Overview

ComicCraft is a Generative AI application designed to transform a short user-provided story idea into a structured five-panel comic narrative. Each panel contains scene description, character actions, dialogue/captions and an image-generation prompt.

Area	Proposed Solution
Objective	Reduce the effort required to structure a comic story from an idea.
Scope	Text-based five-panel comic story generation; automatic artwork generation is a future enhancement.
AI Approach	Prompt-engineered generation using a Google Gemini model through the Google GenAI SDK.
User Experience	Single-page, beginner-friendly interface with generated panels and downloadable output.
Data	No persistent database in the documented current scope; output remains in session and can be downloaded.

Key resources: Python environment, Gemini API access, Streamlit, Google GenAI SDK, python-dotenv and Git/GitHub.
